ETWINNING PROJECT

CHRISTMAS ALL OVER EUROPE

1st activity

The first activity of the project was to send Christmas cards to our partners. The pupils included in this activity were from the 5th class. They were all very excited.

We started by making Christmas drawings during Computer science lessons. The drawings were made in the program Paint.

After printing the drawings we started to make Christmas cards … Pupils used the Internet to get some ideas, and then decided how they want the Christmas cards to look like.

In the mean time pupils from the 5th and the 6th class, during English lessons, wrote many wishes they wish to pupils from other countries …

And here are the results ☺

And finally, after all the work has been done, we sent the cards!
